Version 2026 · Trading binary options involves substantial risk of loss. See the Risk Disclosure on page 11.

WELCOME

What is Smart Binary?

Smart Binary is an online digital-trading platform where you predict short-term market movements and are paid a fixed, visible payout when your prediction is right.

80%
Fixed profit
A winning trade returns your stake plus 80% profit — shown before you confirm.

$5
Minimum stake
Real account stakes run from $5 to $10,000. Demo is for practice only.

M-PESA
Local payments
Deposit and withdraw with M-PESA. Minimum $5 each way.

What you can do here

- **Practice free** on a DEMO account with virtual money — no deposit needed. Demo money cannot be withdrawn.
- **Trade live** on the REAL account on Rise/Fall, Even/Odd, Over/Under and Matches/Differs markets.
- **Let the AI Scanner** analyse all markets and suggest the best one — or run it with take-profit and stop-loss limits.
- **Track everything** — balances, history, notifications and withdrawal status (Delivered / Not delivered) live in the app and by email.
- **Earn with referrals** and join promotions shown on the Promotions page.

Important: Smart Binary does not guarantee profit. You can lose the full amount of any trade. Never trade money you cannot afford to lose.

STEP 1

Getting started

From sign-up to your first withdrawal in six simple stages.

Create and secure your account

1. **Register** at smartbinary.co.ke → *Register*. Use your real email and phone number. You must be 18+ (or the legal trading age where you live). One account per person.
2. **Verify your email.** We send a 6-digit code. Enter it to activate your account. Check Spam/Promotions if you don't see it.
3. **Log in** and you land on your dashboard. A new-login notice is emailed to you for safety.
4. **Practise on DEMO.** Tap the REAL / DEMO switch at the top and choose DEMO. Learn the buttons with virtual money first.
5. **Turn on 2FA** in Account → Security for extra protection.
6. **Verify identity (KYC)** when asked — usually before larger withdrawals — in Account → KYC.

Install the app

Add Smart Binary to your phone's home screen (PWA) from your browser menu, or install the Android app from our website for one-tap access and push alerts.

Forgot password?

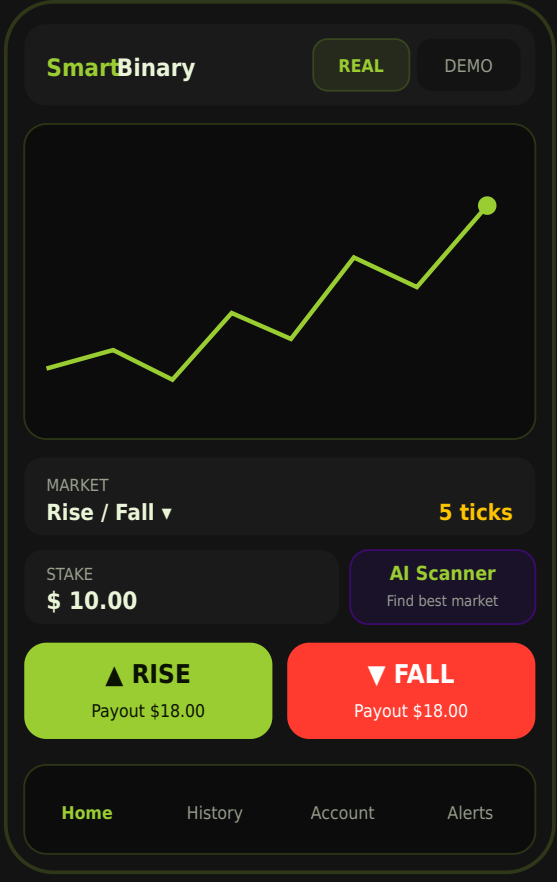

Login page → *Forgot password*. A reset link is emailed to you. We never ask for your password by email, phone or chat.

STEP 2

Your dashboard

Everything happens on one screen. Here is what each part does.

TRADING SCREEN (ILLUSTRATION)

1. **Balance switch**
   REAL or DEMO — tap to change account
2. **Live chart**
   Watch the price move in real time
3. **Market & time**
   Pick what to predict and for how long
4. **Stake**
   How much you put on this trade
5. **AI Scanner**
   Finds the best market for you
6. **Rise / Fall**
   Place your prediction
7. **Bottom menu**
   Home · History · Account · Alerts

Handy to know

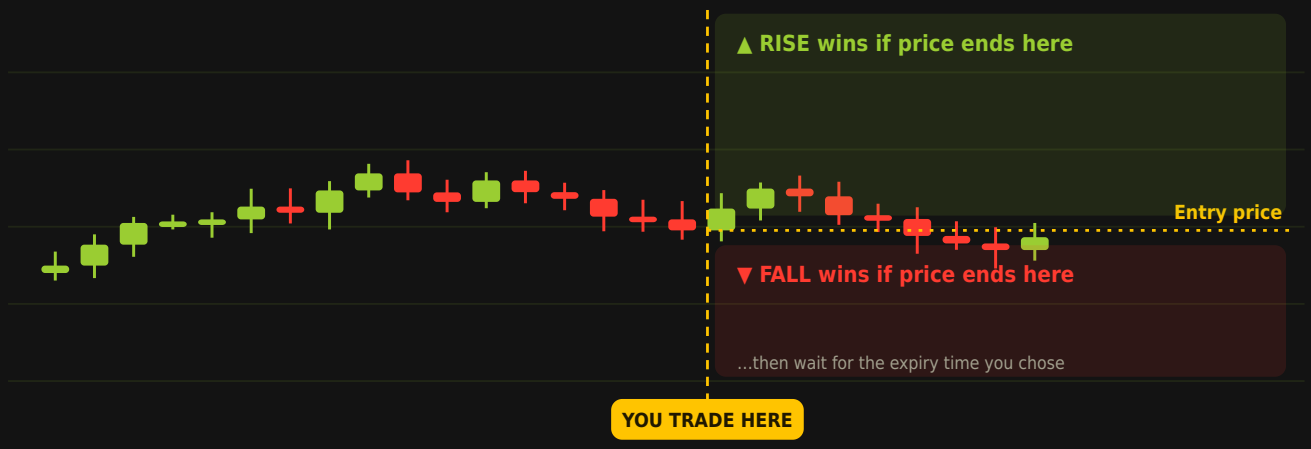

- **Balances** — Real and Demo are kept completely separate and shown at the top.
- **History** — every trade, deposit and withdrawal with its status.
- **Notifications** — trade results, deposits, withdrawals and security alerts.
- **Chat** — tap the chat bubble to message support. Ask “how to deposit” or “how to trade” and our assistant replies instantly with this guide.

STEP 3

How to trade

A trade is a prediction. You choose a market, a stake and a time — then pick Rise or Fall.

READING THE CHART · RISE / FALL

1. **Choose account** — DEMO to practise, REAL to trade with money.
2. **Pick a market** and trade type (Rise/Fall, Even/Odd, Over/Under or Matches/Differs) — or tap **AI Scanner** to find the best one.
3. **Set your stake** with the + / − buttons (real minimum $5). The payout is displayed on each button before you confirm.
4. **Tap RISE or FALL.** The entry price is locked the moment you tap.
5. **Wait for expiry.** When time is up the result shows as a win or loss and your balance updates instantly. Trades cannot be cancelled once placed.

PAYOUT EXAMPLE · $10 STAKE

Your stake returned $10.00	+ 80% profit $8.00

Winning trade: you receive stake + 80% profit = $18.00 on a $10.00 stake.
Losing trade: the stake of that trade is lost. Trade only what you can afford to lose.

STEP 4

Markets & stakes

Four ways to predict. Start with Rise/Fall — it is the simplest.

TRADE TYPES

Rise / Fall
Will the price end higher or lower than your entry?

Even / Odd
Will the last digit of the final price be even or odd?

Over / Under
Will the last digit be over or under your chosen digit?

Matches / Differs
Will the last digit match your chosen — digit or differ?

RULE	REAL ACCOUNT	DEMO ACCOUNT
Minimum stake	$5.00	$0.35
Maximum stake	$10,000	Virtual
Winning payout	Stake + 80% profit	Same rules as real
Can money be withdrawn?	YES	NO — VIRTUAL
Trades cancellable?	No — all trades are final once confirmed	

Smart habits

- Practise on DEMO until you understand every button.
- Start with small stakes. Never chase losses with bigger stakes.
- Decide your daily loss limit *before* you trade — and stop when you reach it.
- Digit markets are fast and volatile. Understand them before using real money.

Remember: a wrong prediction loses the whole stake of that trade. There is no guarantee of profit on any market.

STEP 5

AI Scanner bot

The AI Scanner is Smart Binary's analysis assistant. It looks across the markets and points you to the one with the strongest current conditions.

HOW THE AI SCANNER WORKS

The AI Scanner suggests; you stay in control. Signals are statistical and never a guarantee.

Using it

1. On the trading screen tap **AI Scanner** ("Find best market"). A short analysis runs across all markets.
2. The result card shows the **recommended market** and trade direction. Tap to apply it to your trade.
3. Choose your stake and confirm — or switch to **AUTO** mode and let the bot place trades for you.
4. In AUTO mode always set a **Take Profit** (stop when you've earned enough) and a **Stop Loss** (stop when you've lost enough). The bot stops automatically when either is reached and shows a result summary.

Good to know

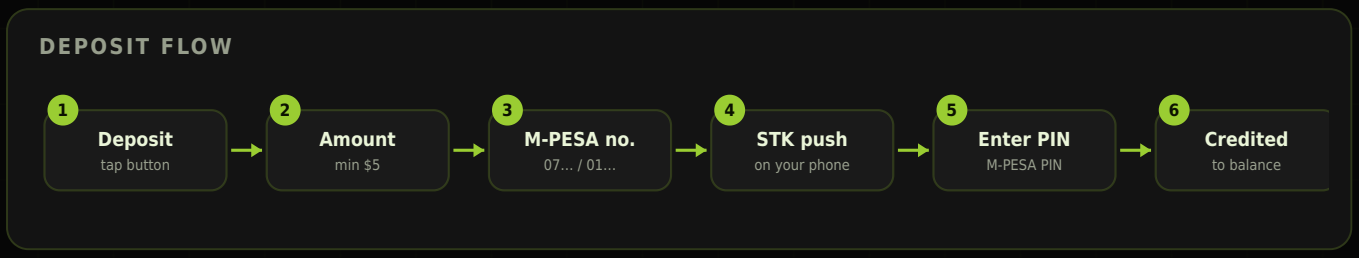

- It analyses recent tick momentum and entry conditions.
- You can stop it any time with the same button.
- Try it on DEMO first.

AI risk: signals are based on historical patterns and mathematical models — not future certainty. Automated trading can lose money quickly. You stay fully responsible for every trade, manual or automated.

STEP 6

How to deposit

Fund your REAL account with M-PESA, Binance (USDT), Bitcoin, Visa / Mastercard or Apple Pay.

1. Tap **Deposit** on the dashboard.
2. Enter the amount in **USD** (minimum **$5**). The KES amount is shown — rate **$1 = KES 128**.
3. Enter the **M-PESA phone number** that will pay.
4. Tap **Deposit**. An **STK push** pops up on that phone.
5. Enter your **M-PESA PIN** and confirm.
6. Your balance is credited automatically and you receive a confirmation notification and email.

QUICK FACTS	
Methods	M-PESA (instant STK push) · Binance USDT (BEP20/TRC20) · Bitcoin · Visa / Mastercard · Apple Pay
Minimum deposit	`$5 (≈ KES 640)`
Currency shown	Balance in USD, payment in KES
Confirmation	In-app, notification and email

Bitcoin, Binance, cards & Apple Pay

- **Bitcoin / Binance (USDT):** pick the method in Deposit, copy the address shown, send on the exact network, tap *I Sent*, then tell us your username, amount and transaction ID in chat.
- **Visa / Mastercard / Apple Pay:** choose them in Deposit. If a method shows "Coming Soon", use M-PESA or message us and we will arrange it with you.

If it doesn't arrive

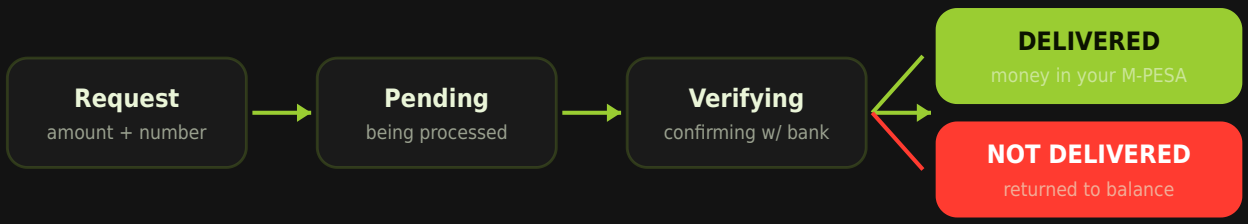

- Check you entered the PIN in time and the phone had network.
- Wait a minute and refresh the page — pending deposits are matched automatically.
- Still stuck? Message Smart Binary support in chat (or smartbinary.co.ke@gmail.com) with your username, amount and the M-PESA message or transaction ID — only we can help you.

STEP 7

How to withdraw

Withdraw to M-PESA or Airtel Money — or Bitcoin, Binance, card or Apple Pay through support — and always see whether it was delivered.

WITHDRAWAL STATUS FLOW

You get an email and an in-app status either way — Delivered, or Not delivered with the reason.

1. Open **Account → Withdraw**.
2. Enter the **amount** (minimum **$5**) and your **M-PESA number**.
3. Confirm. The amount leaves your balance and the status shows PENDING.
4. When the payment is confirmed the status becomes DELIVERED and you get a success email and in-app alert.
5. If the payment cannot be delivered, the status becomes NOT DELIVERED, we email you the reason and the money is returned to your balance so you can try again.

Before you withdraw

- Use a phone number registered in your own name.
- For Bitcoin, Binance, card or Apple Pay withdrawals, tell us in chat your method, amount and receiving details.
- Complete KYC if requested.
- Demo money can't be withdrawn.

Sometimes "Verifying"

If the network gives an unclear answer we double-check with the payment provider before deciding. Your money is never lost — it is either delivered or returned.

STAY SAFE & GET MORE

Security, referrals & support

PROTECT YOUR ACCOUNT

- **Strong password** — unique, never shared
- **2FA enabled** — Account → Security
- **Log out** — on shared devices
- **Beware scams** — we never ask your password

Referrals

Share your personal link from the **Referral** page. When people join through it you earn a commission as shown on that page, and you can follow every referral's activity there.

Promotions & notifications

Open **Promotions** for current offers and their terms. Turn on notifications to receive trade, deposit, withdrawal and security alerts instantly — in-app, by email and as push messages.

Light & Dark

This guide and all Smart Binary emails come in both Light and Dark. Open smartbinary.co.ke/guide.php to switch and download either version; every email has a Light/Dark link at the bottom.

Need help?

Live chat
In the app, tap the chat bubble. Ask about deposits, withdrawals, trading, bonuses or KYC.

Email support
smartbinary.co.ke@gmail.com

Our policy
No refunds · No lending of capital.

Contact only Smart Binary support. We are the only ones who can help you with your account, deposits and withdrawals — tell us anything you need in chat or at smartbinary.co.ke@gmail.com. Never pay or share details with anyone else who offers to "help".
Scam alert: Smart Binary staff will never ask for your password, PIN or verification codes — not by email, phone, chat or social media. Report any such request immediately.

PLEASE READ CAREFULLY

Risk disclosure

Important warning: Binary options and digital trading products carry a high level of risk to your capital and may result in the total loss of your investment. They may not be suitable for all investors. Only trade with money you can afford to lose entirely.

General risk

Trading binary options, volatility indices, forex and cryptocurrency involves substantial risk of loss. Smart Binary provides a platform for digital trading — it does not guarantee profits or protect against losses. Past performance of any instrument, strategy or algorithm does not guarantee future results.

AI trading risk

- AI signals are based on historical patterns and mathematical models, not future certainty.
- Market conditions can change faster than any model can react.
- Automated trading can produce rapid losses. Always use Take Profit and Stop Loss.
- You remain fully responsible for all trades, manual or automated.

Market-specific risks

MARKET	RISK
Volatility indices	Synthetic markets with continuous random movement — extremely fast and unpredictable.
Boom & Crash	Sudden spikes can cause immediate significant losses.
Forex	Affected by geopolitical events, central-bank decisions and economic data.
Cryptocurrency	Extremely volatile — prices can move 20–50% within hours.
Binary options	All-or-nothing: a wrong prediction loses the full trade amount.

Do not trade if…

- you cannot afford to lose the money · you don't understand how the products work
- you are in financial difficulty or under pressure · you are under 18 (or the legal age where you live)
- you are trying to win back previous losses

Nothing on the platform — including AI signals and analysis — is financial advice. Full text: smartbinary.co.ke/risk.php

THE SMALL PRINT, MADE SIMPLE

Terms · Privacy · FAQ

Terms & Conditions (summary)

- 18+ (or local legal age); accurate details; one account per person.
- Keep your password private and enable 2FA.
- Trades are final once confirmed; payout shown before you trade is the payout you get.
- Technical errors or exploits can void trades and lead to account closure.
- Demo funds are virtual and cannot be withdrawn.
- The AI bot is a tool — you're responsible for your trades.

Privacy Policy (summary)

- We collect account, KYC, payment, trading, device and support-chat data.
- Used to run your account, process payments, prevent fraud and meet legal duties.
- We never sell your personal data.
- Shared only with payment processors, ID-verification partners, fraud-prevention services or when the law requires.
- Passwords are stored encrypted; full card numbers are never stored.

Frequently asked

How do I start?	Register → verify email → practise on DEMO → deposit → trade.
Minimum deposit / withdrawal?	$5 each ($1 = KES 128). M-PESA, Binance, Bitcoin, Visa/Mastercard, Apple Pay.
How much do I win?	Stake + 80% profit on each winning trade; shown before you confirm.
Can I cancel a trade?	No. Trades are final once confirmed.
Was my withdrawal delivered?	Check History or your email — it clearly says Delivered or Not delivered.
What is the AI Scanner?	An assistant that analyses markets and suggests the best one — never a guarantee.
Refunds? Loans or capital?	No refunds and no lending of capital. A failed withdrawal returns to your balance automatically.
Who do I contact?	Only Smart Binary support: chat or smartbinary.co.ke@gmail.com.
Forgot my password?	Login → Forgot password; a reset link is emailed.
